

I would like for the CBA to remove their petition to those of us that would like privacy regarding solicitations via the phone, no matter if we do business with them or not. It is a violation of my right as not only a professional in the Telecommunications arena, but also a consumer of it, to have unlawful solicitations come to my phone, no matter if they see this lawful or not.

If they do not, I may consider withdrawing my current business from those that support this cause that is contrary to my wishes and I'm sure, many others in the state of Indiana.

If this docket gets passed on CBA's part, then this Indiana do-not-call list is totally in vain, and congress is wasting more money to big business' favor and not to the consumer's advantage.

Thank you.
